Hello, my name is Arturo Bravo Rovirosa, I study computer systems engineering in Mexico.

I consider myself a hardworking, committed, constant person who fights to the end for his dreams.

Since the first semester of university I have concentrated on programming, started doing videogames in Unity, I love being able to create my own games, and that people like it, it was a good time, I can did 3 games that are currently in the google play:

the first, MateFacil, a game created in Unity for solving Math questions
(Addition, subtraction, multiplication and division) with a limit of 5 seconds each. The player needs to select an answer from 4 possible options.
https://play.google.com/store/apps/details?id=com.Rovirosa.games.MateFacil&hl=es

the second, Exit way: This is a puzzle game where you have to help the character to get out in every level.
https://play.google.com/store/apps/details?id=com.Rovirosa.games.ExitWay&hl=es

and the third, Boom: Help young kids to get inside the black hole.
https://play.google.com/store/apps/details?id=com.rovirosa.jetpack&hl=es

After completed my dream of making video games, I wanted to achive another dream, to make my own social network, I dedicate a lot to learn Ruby on Rails, and after 1 year of development, I achieve my goal, "Talk the new social network".

http://talk-social.herokuapp.com

You can use this user to login or create a new one:

email: arturo123leyenda@gmail.com
password: televison

And I did an internship in Faurecia: Global leader in automotive equipment, where I did a platform to the Human Resources area made in Ruby on Rails, hosted in heroku and with AWS.

I am good, I am consistent, I am autodidact.

Thank you so much
 Kind regards
